Nanthaphat Nikam

Programmer | Mobile & Backend Developer
nanthaphat1386@gmail.com | 092-783-1218 | Nonthaburi, TH, Thailand

PROFESSIONAL SUMMARY

Reliable programmer with hands-on experience improving software stability through testing, debugging, and clean-code practices. Works with SQL, GitHub, and backend services to support efficient development and accurate data handling. Brings strong collaboration skills and a sharp eye for detail, helping teams maintain high standards and resolve issues quickly. Delivers measurable quality improvements and a strong commitment to dependable software.

TECHNICAL SKILLS

- **Programming Languages:** TypeScript, Go, PHP, Dart
- **Frameworks:** React, React Native, Flutter
- **Databases:** PostgreSQL, SQL Server, MySQL
- **Tools & Environment:** Git, DBeaver, Visual Studio, Postman, Figma, Android Studio
- **Key Concepts:** RESTful API Design, Database Optimization

PROFESSIONAL EXPERIENCE

Programmer

Mappointasia Logistics Solutions Company | October 2025 – Present

- Developed, tested, and maintained software applications using clean, efficient code to support business requirements.
- Debugged and resolved software defects, improving application stability and reducing recurring issues.
- Participated in code reviews to ensure adherence to coding standards, best practices, and maintainable architecture.
- Built and integrated RESTful APIs and backend services using Go/PHP to enable seamless data exchange.
- Used version control systems such as Git and GitHub to manage source code and support team collaboration.
- Assisted in database queries and data manipulation tasks using PostgreSQL and MySQL to support application functionality.

PROJECTS

eZView MOVE (System Management Module)

- Implemented Role-Based Access Control (RBAC) to separate admin controls from standard staff permissions.
- Designed a highly responsive and user-friendly web interface ensuring seamless dashboard navigation across desktop and mobile browsers.

eZView + (Mobile Application)

- Developed and maintained a cross-platform mobile application (Flutter / React Native) serving as a vehicle tracking and fleet management system via real-time GPS telemetry.
- Designed a highly responsive and intuitive mobile interface optimized for seamless map navigation and live tracking views across both iOS and Android devices.
- Optimized WebView performance and resource usage to ensure high stability, smooth user interactions, and reduced latency during real-time updates.
- Integrated Google Maps API and RESTful APIs to fetch and render real-time telemetry data, vehicle statuses, and route histories accurately.
- Managed application build and deployment processes on App Store Connect and Google Play Console.

EDUCATION

Bachelor of Computer Science

Mahasarakham University | GPA: 3.04 | Graduated: 2025

LANGUAGES

- **English:** Fluent
- **Thai:** Native
